

- defense response to virus
- leukocyte activation involved in immune response
- negative regulation of immune system process
- lymphocyte activation
- immune response-regulating signaling pathway
- myeloid cell activation involved in immune response
- response to interferon-alpha
- lymphocyte activation involved in immune response
- multi-organism transport
- alpha-beta T cell activation
- regulation of production of molecular mediator of imm
- negative regulation of immune effector process
- metaphase plate congression
- regulation of defense response to virus
- B cell proliferation
- Malaria
- negative regulation of cation transmembrane transpo
- antigen processing and presentation
- Transport of inorganic cations/anions and amino acid
- icosanoid biosynthetic process
