

- adaptive immune response
- Interferon alpha/beta signaling
- immune effector process
- response to type I interferon
- regulation of response to biotic stimulus
- response to interferon-alpha
- response to interferon-beta
- Immune response to tuberculosis
- myeloid cell activation involved in immune response
- Natural killer cell mediated cytotoxicity
- Immunoregulatory interactions between a Lymphoid :
- Type II interferon signaling (IFNG)
- pattern recognition receptor signaling pathway
- positive regulation of cytokine production
- SARS-CoV-2 innate immunity evasion and cell-speci
- regulation of thymocyte migration
- T cell activation
- granulocyte activation
- regulation of lysosome organization
- ISG15-protein conjugation
