

- Cell Cycle
- mitotic cell cycle process
- DNA conformation change
- Cell Cycle Checkpoints
- covalent chromatin modification
- DNA replication
- cell cycle phase transition
- regulation of chromosome organization
- chromosome condensation
- SUMO E3 ligases SUMOylate target proteins
- protein import into nucleus
- PID E2F PATHWAY
- chromatin organization involved in negative regulation
- Chromatin modifying enzymes
- meiotic cell cycle
- lymphocyte activation
- regulation of kinase activity
- kinetochore organization
- PID FOXM1 PATHWAY
- Mitotic G2-G2/M phases
