

- adaptive immune response
- positive regulation of immune response
- regulation of response to biotic stimulus
- defense response to virus
- Immunoregulatory interactions between a Lymphoid ;
- negative regulation of immune system process
- regulation of defense response to virus
- response to interferon-alpha
- neutrophil activation
- alpha-beta T cell activation
- SARS-CoV-2 innate immunity evasion and cell-speci
- pattern recognition receptor signaling pathway
- regulation of natural killer cell chemotaxis
- positive regulation of respiratory burst
- TRAP-SMCC mediator complex
- T-helper 2 cell cytokine production
- mitochondrial transcription
- I-kappaB kinase/NF-kappaB signaling
- Type II interferon signaling (IFNG)
- positive regulation of programmed cell death
