

- Deubiquitination
- protein O-linked mannosylation
- DNA recombination
- proteasomal protein catabolic process
- defense response to protozoan
- RHOQ GTPase cycle
- regulation of cellular protein localization
- cellular response to gamma radiation
- negative regulation of protein dephosphorylation
- Angiopoietin-like protein 8 regulatory pathway
- positive regulation of cell morphogenesis involved in
- PTEN Regulation
- organophosphate ester transport
- regulation of plasma membrane bounded cell project
- morphogenesis of a polarized epithelium
- response to drug
- glial cell migration
- positive regulation of cellular catabolic process
- cell division
- positive regulation of cell death
